Logo Format Usage:

The standard logo is the horizontal layout; the stacked logo should be used as a secondary option, depending on the fit of the marketing piece being created. The flat black logo can also be used as flat white, and should be used when printing on objects such as pens, or any object using a flat imprint. Please use the full color logo whenever possible. When sending logo files to vendors, they will often need the .eps file for print.

TOKIOMARINE HIGHLAND

This basic TMH PPT template is available for everyone to use. You can make any background image changes and edits under the SlideMaster. This template has a sample table and bulleted list for use, along with instructions for where to find icons. The font used throughout all body text is Arial or Arial Narrow. The title font is Anton, and is embedded within the file.
